

STRATEGOS & MIPET Webinars

Intelligence: Analysis on modern Assyrian Region

16.30-18.00 GMT+2, May 7, 2021, Webinar on STRATEGOS Webinar (by MS TEAMS)

16.00-17.30 GMT+2, May 10, 2021, Webinar on STRATEGOS Webinar (by MS TEAMS)

Prof. Paolo Scotto di Castelbianco, Genoa University & former Director Intelligence School at DIS

Prof. Agostino G. Bruzzone, Genoa University, President MIPET & Council Chair Strategos

This Webinar uses the current Assyrian Region as a case study to stimulate analysis respect the Major Questions on a complex Scenario where it is required to support Decision Makers. The Class is stimulated to understand the situation respect open issues

Intelligence Analysis is proposed over a realistic current case study focused on **Assyrian Region** and considering the relative complexity. This **Stimulus** is used to identify the context and **extract from data sources** and using **different tools and methods**. The **STRATEGOS Class** and **Guests** are invited to investigate this Scenario and to be ready to answer to questions and identify doubts, opens issues and criticalities interactively during the **Webinars**.

The **Assyrian Region** involve many different aspects and a long story, therefore this complexity deals exactly with the problem to be able to frame this Scenario and address specific questions of Decision Makers by providing **Intelligence Service** based on **modern Analysis & Strategic Engineering methods**.

The problem is investigated by a wide spectrum of points of views including **Geo Political Strategies** and **Industrial Initiatives** considering the nature of the **Different Players** and their expected future behaviors. From this point of view it is overstressed the importance during the analysis to be able to properly **identify** and **rank different info & data sources** as well as to check **correlations & inconstancies, process data, discriminate manipulation & fake news, evaluate different players goals and constraints, discriminate plots from idiocy, extract interests, quantify risks & opportunities..**

The **STRATEGOS Class** had the task, to get a **picture of the Assyrian Region** in **48 hours** during weekend and to able to plat this **Intelligence Game** on Monday with **the Chair** that play the role of **Decision Makers**. Indeed, **Prof. Paolo Scotto** has a very long and highly qualified experience in this sector as well as a vision about how to use **new Technologies, Resources, Approaches & Techniques** to be successful in this area in **Modern World**.

These **Webinars** are part of **Intelligence Workshops** organized by **STRATEGOS** and **MIPET** in **Genoa University** and provides **2CFP** each to Engineers

**Genuense
Athenaeum**
