Cyber Security is a major issue in many different frameworks and Nautical Activities are exposed to these Risks and require to be addressed by innovative Approaches

The first major public demonstration of GPS Spoofing was carried out on Italian Coast over a 80M\$ Motor Yacht as University Experiment.

Today at 61 Edition of Salone Nautico, Top Experts provide a view about these Risks as well as Countermeasures not just in terms of specific tools and devices, but as a Systemic Approach to face this Challenge.

This is a great opportunity even to present STRATEGOS, 1st MSc in Strategic Engineering in Italy and among first ones worldwide, that prepare the future generations of engineers devoted to deal with these kinds of Risks The event is jointly organized with CNI, Genoa University and Salone in order to confirm the Capability to improve Safety and Security over Seas as well as the whole extended multidisciplinary framework were our Society live (i.e. land, air, sea, underwater, space and cyber space)

This Meeting is a blended event (live & virtual) and it guarantees 3 CFP for Engineers thanks to Ordine degli Ingegneri attending the event. Due to limited live chairs, please be sure to book in advance a seat by sending a request to Antonio Giovanetti
