

# STRATEGOS Webinar

## Intelligence: Geopolitics and Strategic Assets

11.00-12.30 GMT+2, May 15<sup>th</sup> **NEW**, Webinar (by MS TEAMS) Warmup Session starting at 10.30 GMT+2

Prof. Paolo Scotto di Castelbianco, Genoa University & former Director Intelligence School at DIS

Prof. Alessandro Leto, Water Academy SRD Co-Founder & Director

Prof. Agostino G. Bruzzone, Simulation Team President & **STRATEGOS** Council Chair

This Webinar focuses on Strategic Assets as key elements for Intelligence Analysis and specifically on Water within the Actual Situation on going in the Assyrian Region

Intelligence Analysis requires to understand the **Complexity** of the **Scenario** and the **Key Elements**, Often these include **Strategic Assets** that are **Fundamental Resources** for all the Players.

Among these **Assets** there are often not only **Natural Resources** and **Infrastructures**, but even **Basic Elements** such as **Water**. To conduct a proper **Analysis** it is fundamental to identify these elements and evaluate their impact on **People, Activities, Players** and **Interests Groups** as well as to read the **News** and **Data** inspired by this **Awareness**.

**Decision Makers** should be aware of these elements and on how these are controlled and/or influenced by on going actions in order to properly react. Considering the **Extreme Need** of these **Resources** it is evident that often these elements are the basis for **Life & Health Care** of **People** and **Survival** of **Institutions**.

This **Webinar** still focused on the realistic case study on current situation on the **Assyrian Region** and its multiple complexities, adding a special focus on **Water** as **Strategic Asset**.

The **STRATEGOS Class** and **Guests** are invited to focus on this element to be ready to read and understand spill of information as well as to create a correct picture of the situation. In this case the discussion will be driven by **Prof. Paolo Scotto** and **Prof. Alessandro Leto** that have a long and highly qualified experience in these subject as well as a very modern vision how to approach these issue, while **Prof. Agostino G. Bruzzone** will point out potential of **Modelling, Simulation & AI** to consider these aspects Indeed, it is evident that the **Strategic Engineering** and related **Models, Simulations** and **Data Analytics** based **AI** and **Advanced Algorithms** provides a **Competitive Advantage** in this field both for **Geo Political** and **Industrial Decision Makers** respect **Risks, Threats** and **Opportunities** in the area.

This **Webinar** is part of **Intelligence Workshops** organized by **STRATEGOS** in **Genoa University**

**Genuense  
Athenaeum**
