

# STRATEGOS Webinar

## Pandemics: Downgrading Way, Risks & Lessons

10.00-12.00am GMT+2, April 16<sup>th</sup>, 2020, Webinar (by Microsoft TEAMS Click Here)

POC: Agostino Bruzzone, Simulation Team President and **STRATEGOS** Council Chair  
Webinar will be in English and running on MS TEAMS

This Webinar addresses the crucial step forward to downgrading measures in terms of proper timing, risks and possible ways to unlock industries and business as well as Lessons Learned from China, Singapore, South Korea to face the Pandemics

The **Lockdown** against **COVID-19** seems to be effective even if it emerges that as soon as it is released there are waves ramping up very quickly the infections and revamping the Pandemics. The related **Risks** and **Behaviors** emerged in Singapore, South Korea, Japan and even China. From other point of view, the **Lockdown** cannot be maintained for indefinite time due to its impact on **Economy, Business, Logistics** and **People**, so it is crucial to identify what could be the good way and moment to downgrade the current constraints, paying attention to don't let the epidemic to explode again as it happen in previous cases. In order to be successful we need to define **New Ways to Work** and to **Carry Out Businesses** as well as **Social Life**. We need to identify **New Solutions** that should be **sustainable, economic** and **robust** in terms of **Policies, Procedures, Equipment, Mobile Apps, Cloud Service and Technological Aids**. There is still a lot of uncertainty on the **virus**, therefore it is important to identify needs and look for ways to satisfy them, taking care of previous experiences and lessons learned around the Globe considering that the most stressed layers, as Health Care, are seeing some improvements in Italy. In this sense, the **Strategic Engineering** approach is one of key discipline to address these issues and it should support **Companies, Industries, Institutions, Authorities** and **People** in addressing this challenge. Experts from around the globe present directly and by videos their points of view based on current scientific evidence, public information and potential from possible solutions. This **Webinar** is part of a **Pandemic Webinars** organized by **STRATEGOS** in **Genoa University**
