

STRATEGOS Webinar

Pandemics: Mitigation & Proactive Actions

16.00-18.00 GMT+2, April 6th, 2020, Webinar (by Microsoft TEAMS [Click Here](#))

POC: Agostino Bruzzone, Simulation Team President and **STRATEGOS** Council Chair
Webinar will be in English and running on MS TEAMS, VSEE as Contingency Solution

This Webinar addresses the issues related to combined use of Mitigation and Proactive Actions to face Pandemic Crisis and plan ahead avoiding to be run down by several multiple infectious waves

DISC

Covid-19 is a huge challenge for the **World** and despite we are learning more about the virus, several aspects are still pretty vague while casualties growth and **Social Layers** are overstressed. So several **Strategies** are under evaluation to **Face the Crisis**, but there is strong **Necessity to create Smart Interdisciplinary Teams** able to develop **Proactive Solutions** to take the lead and create even basis for follow on respect the crisis in terms of new Products and Services able to support **People, Companies & Nations**. The ongoing statistical analysis about this epidemics is useful, but it is currently evident that it looks just to the past and don't allow to predict the future respect our decisions, nor to evaluate effectiveness of reactions and proactive initiatives to be activated. In facts, just waiting for the virus to expire and simply relying on social distancing could be not enough nor sustainable respect the capability of the Society to face the crisis of **Health Care System, Logistics, Occupation, Finances** and considering potential **Vulnerabilities** of **Strategic Assets, Social Fabric** as well as **Power, Water, Gas Grid & Communication networks**.

The current situation with so many infections is expected to create **Enduring Multiple Infectious Waves**, so it requires **effective Strategies** to be defeated. The **Strategic Engineering** approach is one of key discipline to address these issues and should work **Side by Side** with different **Transdisciplinary Experts** to outline valuable actions including **Design and Deployment of new Solutions** in terms of **Smart Procedures, ICT devices, Reliable Decontamination Systems, Decision Supports**.

The Experts will present their point of view even considering the ongoing situation from Italy to Singapore from USA to UK to look forward in order to identify the proper approach to **Spearhead the Counter-attack** against the pandemic and **Unblock the Current Deadlocks**. In this frameworks **Models and Solutions** based on **Strategic Engineering** will be presented as examples to dynamically and continuously support Decision Makers based on Action effectiveness on the field.

This **Webinar** is part of a **Pandemic Webinars** organized by **STRATEGOS** in **Genoa University**

Università di Genova
