

STRATEGOS Webinar

Strategies for Operations during covid-19

16.00-17.30 GMT+2, May 25th, 2020, Webinar (by Microsoft TEAMS Click Here)
POC: Agostino Bruzzone, Simulation Team President & STRATEGOS Council Chair
Webinar will be in English and running on MS TEAMS

This Webinar addresses the use of new technologies to develop Solutions to operate in Business, Industries, Logistics, Retail considering covid-19 crisis

This **Webinar** addresses the *Crucial Issues* related to support **Operations** in presence of risks related to **covid-19** and the related **Solutions**. In this view it is proposed **Strategic Engineering** as combined approach to identify best effective solutions considering the necessity to reduce risks by **Procedures, CyberPhysical Systems, Technological Infrastructures and/or Changes in Modus Operandi**. In facts, this problems deals with a lot of uncertainty and with the need to guarantee **Effective & Sustainable Operations** with acceptable **Safety Levels**. From this point of view it is crucial to consider short terms as well as medium and long terms actions as well as their **Costs** respect the **Benefits**. The **Webinar** combines different point of views as well as **Key Performance Indicators** including also **Competitiveness, Reliability, Quality of Life**. It is evident that due to the uncertainty related to the current threat, but also considering potential future scenarios, it is fundamental to develop an approach to monitor and control the processes in order to **correct assumptions** and **fine tune models**, from this point of view, in addition to specific sensors, that are not really available and effective nowadays, it is fundamental to develop some kinds of **new consciousness** based on **Social Media, Individual Mobile Solutions** and **Data Fusions** from different **Info Sources**. Obviously, **Simulation, AI, Modeling & Data Analytics** are expected to be the pillars for these solutions and to be used in closed loop to understand the dynamic evolution of the situation

This **Webinar** is part of a **Pandemic Events** organized by **STRATEGOS** in **Genoa University**
