

“

Never stop seeing
the unseen

There is a universe to explore.
It's inside of us.

Whether by ultrasound, magnetic resonance imaging or information technology Esaote will never stop exploring that universe with its hidden depths, hard to reach and show: the universe of human being.

THE GROUP

Who we are

A long-term engagement

Esaote is an international Group engaged since ever in the research, manufacturing and commercialization of technological solutions aimed at achieving levels of excellence and efficiency in the field of diagnostic imaging.

Mission, vision and values

More than a philosophy

In Esaote we have chosen five fundamental values at the base of our global corporate culture. They define how we want to act and manage our activities, and help us create value for our stakeholders.

THE PRODUCTS

All information about Esaote's products, technologies and activities contained in this section are intended for healthcare professionals only. Technology and features are system/configuration dependent. Specifications subject to change without notice. Information might refer to products or modalities not yet approved in all countries. Healthcare IT

Today Esaote is a point of reference in Healthcare IT at international level.

Three independent companies:

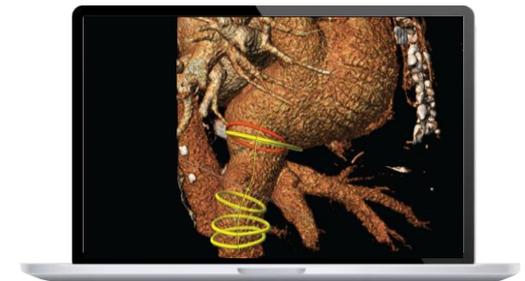

Software systems used for data and image storage, networking and retrieval in Cardiology, Cardiac Surgery, Radiological Intervention (PACS / RIS / CIS)

World leader in quantitative analysis software for cardiovascular angiography

Preoperative planning software on CT images for structural and endovascular Cardiology and endoprosthesis planning for Interventional Radiology

INNOVATION & TECHNOLOGY

Continuous innovation is our real strength

In order to increase productivity and improve efficiency Esaote is adopting new standards and processes as well as new information systems and technologies.

Automate planning, scheduling and execution processes drive greater agility and responsiveness to our Clients

Automatization and control of manufacturing in probes production

Innovation and research

We live the future

R&D is crucial for
the sector.

Esaote has always invested between 8 and 10% of its consolidated sales in R&D; over 20% of employees are engaged in these activities.

Esaote team

Efficiency and commitment are key

- Multidisciplinary and multicultural teams that integrate multiple points of view
- The sharing of values and objectives that unites the people of the Group in daily challenges and brings them closer to the needs of their stakeholders
- Precise rules, roles and processes inside the organization give strength and help to recognize objectives and get achievements.

Awards

A path of recognizable value

In its successful life Esaote was able to establish itself in a highly innovative sector – as technology in healthcare is – and to achieve great results from a scientific and technological point of view.

The "how" Esaote participated in the common experience of progress in various fields - in terms of innovation, investments in research, human capital and technology, as well as for its extraordinary product design – earned it numerous accolades and international recognition.
