«A people cannot have prospects for growth without having a cultural and educational growth of its young generations»

putting the person at the center

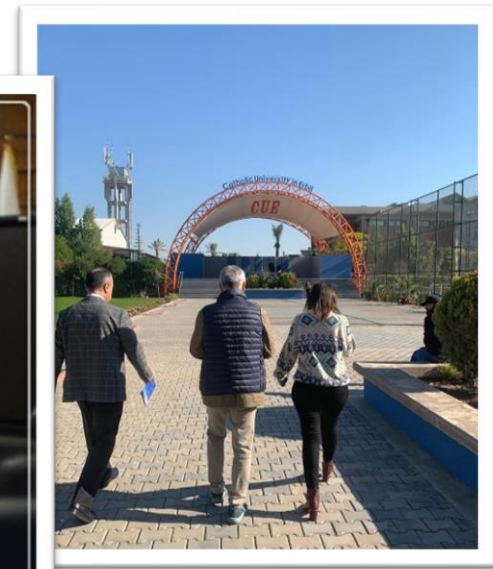

Who I am

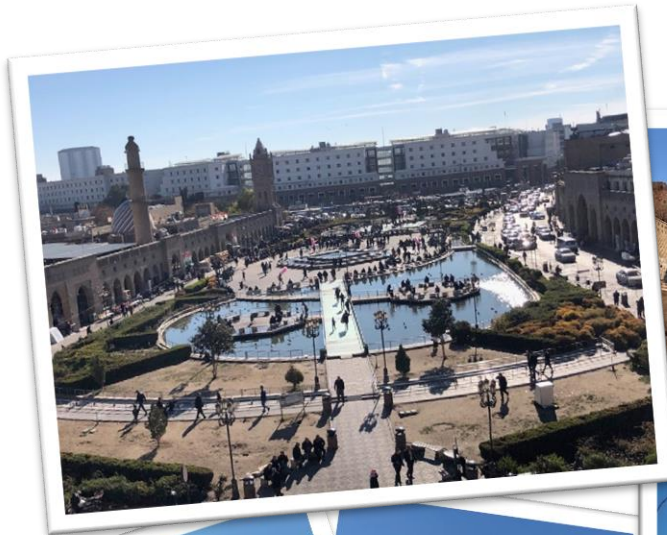

My visit to the CUE

have legs and feet to walk alone

Some suggestions for looking ahead

- presence of constant technological evolution
- hunger for information and data
- needs to plan and implement services
- ability to imagine, model and simulate
- innovative tools that can combine needs with strategy (AI, ML, ...), but
- requirements for greater awareness of their use, and
- excellence in being recognized, in teaching ...

**combining tradition, history, and contemporaneity
and overcoming social barriers**

**good educational models today,
to have more aware citizens tomorrow**
