Sustainable Use and Responsible Development of Water Resources is a crucial issue all around the world considering the necessity to have an **inclusive approach** to *model*, *study* and *evaluate* all the different issues. Indeed there an evident internationally need for a **new Water Culture** and an opportunity for **Talents** operating in this field

It was said that “**We are made of time and water**, for this reason we are aware of the absolute value of **Water Resources** indispensable to any form of Life on Earth and never irresponsibly risked as today”. We firmly believe that there is a large need to develop **Skills & Capabilities** in order to properly Analyze the Problem and to work to support the adoption of new development models genuinely sustainable.

“Because water, as it is known since classic antiquity, is the fundamental element that guarantees and regulates biological life on our planet, and only through its widespread access, its balanced and efficient management and its growing protection, allows the attainment of the minimum standards of living in our communities, below every latitude.

This **Webinar** is part of **Workshops** organized by **STRATEGOS** in **Genoa University**
